

New Research Faculty positions at PENN-CHOP

In partnership with Research Institute at the Children's Hospital of Philadelphia (CHOP), the University of Pennsylvania School of Nursing (PENN) is providing several exciting opportunities for nurse scientists to engage in inquiry that addresses the research priorities of both CHOP and PENN.

We are inviting candidates to embed their nursing research within existing multidisciplinary teams at CHOP building their program of research in one of the following strategic areas of emphasis: big data, precision science, nutrition science, palliative care, traumatic stress, community based research, pediatric sepsis/critical care and improvement science. Candidates will have demonstrated evidence in the conceptualization and/or implementation of research projects that have led to the generation, development and dissemination of new knowledge in nursing.

We invite nurses within five years of finishing their PhD in nursing to apply for a role in the associated faculty in the research professor track. Postdoctoral training or academic experience is not expected. Rank and salary will be commensurate with qualifications and experience.

The University of Pennsylvania School of Nursing, one of 12 Schools in a highly-ranked institution, is dedicated to the integration of interdisciplinary research, education, and practice. The School of Nursing seeks to recruit faculty with the greatest potential to contribute to the health of the public. Expertise in promoting the health of diverse populations, in managing complex care needs, in precision science, and data science are our overarching priorities.

The University of Pennsylvania is an EOE. Minorities / Men / Individuals with disabilities / Protected Veterans are encouraged to apply.

Those interested in the faculty positions should submit a cover letter and their curriculum vitae at <http://apply.interfolio.com/67168>.
