

School of Nursing VPN  
Mac Installation Instructions

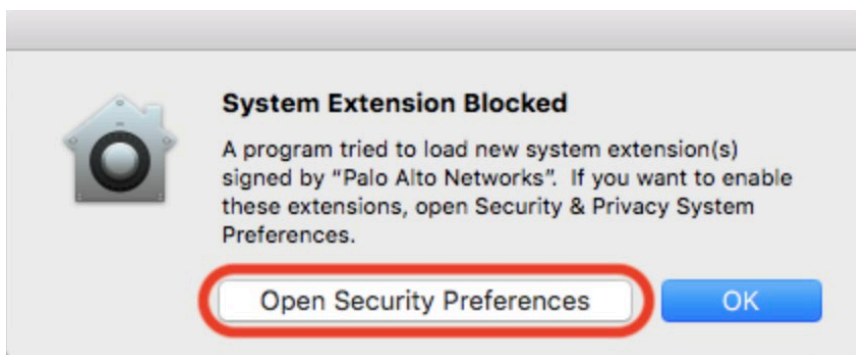

1. Browse to the website <https://vpn.upenn.edu/> to download the application.

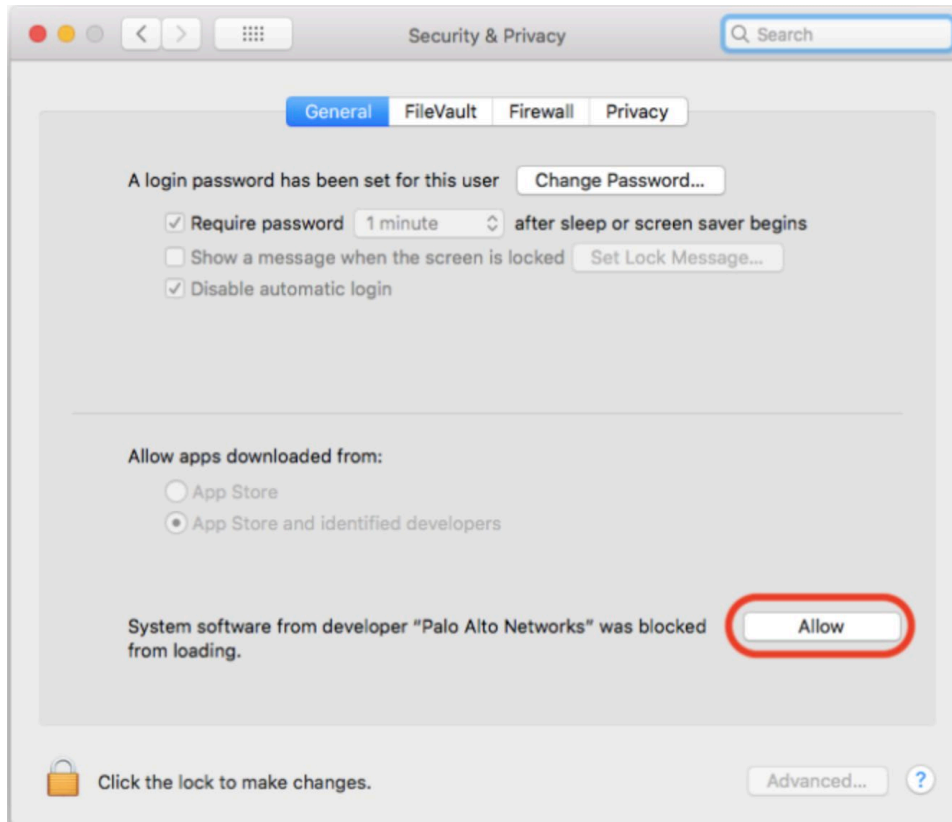

2. Click on Download Mac 32/64 bit GlobalProtect agent.
3. This will download a file named GlobalProtect.pkg; double click the file to begin downloading.

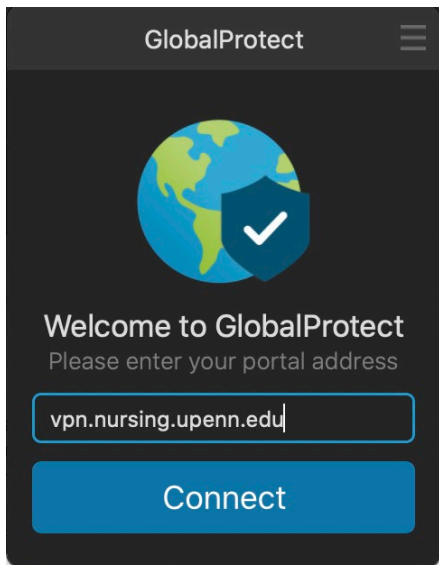

4. Select "Continue" to proceed through the installation.
5. You may need to approve kernel extensions in order for the GlobalProtect VPN client to function normally. If this happens, you will be prompted with a dialog box like the one below. Select "Open Security Preferences."

6. This will open your System Preferences dialog box. At the bottom of the Dialog box you will see that what you are downloading was blocked from loading. Please select Allow.

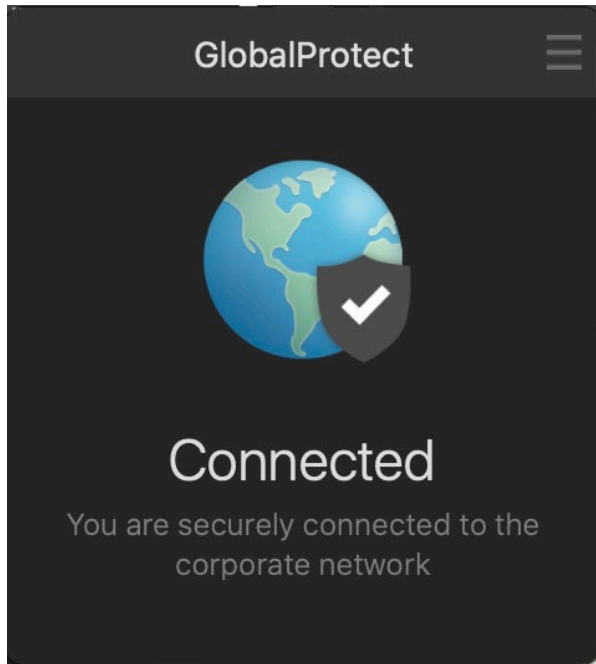

7. Once the application is installed you will see an icon appear in the top right of your screen and the icon will have a picture of a globe. When you open the application, you will need to provide the Portal address:

8. You will then click on Connect.

9. Once you successfully log in with your School of Nursing credentials, the Globe icon should say connected.

10. Once you are connected, you can now remotely access your School of Nursing desktop as you normally do.
