1984-1985 Charge Nurse/Staff Nurse,  
Medical Center at Princeton, Princeton, NJ

### **OTHER ACADEMIC APPOINTMENTS**

2018-present Research Associate, Population Aging Research Center, University of Pennsylvania

2018-present Senior Fellow, Leonard David Institute, University of Pennsylvania

2016-present Adjunct Professor, Johns Hopkins University, School of Nursing

2014-present Associate Faculty, Center on Aging and Health,  
Johns Hopkins University, School of Medicine

2011-present Principal Faculty, Center for Innovative Care in Aging,  
Johns Hopkins University, School of Nursing

2011-present Research Associate, Population Aging Center,  
Johns Hopkins University, Bloomberg School of Public Health

2007-2011 Senior Research Scientist, Center for Applied Research on Aging and Health,  
Thomas Jefferson University

2001-2007 Senior Research Scientist, The Polisher Research Institute, Madlyn and Leonard  
Abramson Center (formerly the Philadelphia Geriatric Center)

### **CURRENT CERTIFICATION/LICENSURE**

Registered Nurse: Maryland (R195183)

Registered Nurse: New Jersey (26NR06148700; Inactive-Paid)

Registered Nurse: Pennsylvania (RN268315L)

### **HONORS/AWARDS/MEMBERSHIPS IN HONORARY SOCIETIES**

2018 Senior Faculty Research Award, Department of Biobehavioral Health Science, University  
of Pennsylvania, School of Nursing

2018 Inaugural Deans' Distinguished Visiting Professorship, University of Pennsylvania,  
School of Medicine

2016 Anthony Buividas Endowed Term Chair in Gerontology, University of Pennsylvania

2015 Johns Hopkins Leadership Award Program for Women Faculty

2014 Fellow, American Academy of Nursing

2013 Fellow, The Gerontological Society of America

- 2013 Outstanding Pathfinder Award, Maryland Nurses Association
- 2013 Excellence in Research Award, Gerontological Advanced Practice Nurses Association
- 2011 Award of Appreciation, Alzheimer’s Association, Delaware Valley Chapter
- 2009 American Cancer Society-Kimmel Cancer Center Institutional Research Award
- 2004 Archstone Foundation and American Public Health Association Award for Excellence in Program Innovation, Honorable Mention
- 2002 Recipient of NIH Loan Repayment Program
- 2001 Oncology Nursing Society Research Scholarship Award
- 2000 RAND Summer Institute on Epidemiology and Aging Scholarship Award
- 1999 Ethel F. Lord Fellowship Award in Geriatric Research, Soroptimist International
- 1997 Teaching Assistant Award, University of Pennsylvania, School of Nursing
- 1987 National Institute of Mental Health Traineeship Award, US Public Health Service

**Current Grant Support**

- 1.R01AG061945, (Hodgson, Gitlin, MPI) 11/1/2018-10/31/2022  
 NIA  
*Training and Fidelity Model to Move and Scale Evidence-based Dementia Care and Caregiver Support Programs into Practice: The Case for COPE in PACE service settings*  
 This 5 –year trial will develop and test a novel online training program will be compared to a usual training condition (high intensity face-to-face) using a non-inferiority randomized trial design. In addition we will develop a scalable approach to monitoring and ensuring “real world” fidelity of delivery in the community using computer linguistic technology. The two training conditions will be evaluated in terms of provider level outcomes (confidence in program delivery and mastery of COPE principles), fidelity adherence using the computationally derived methodology, and outcomes related to persons with dementia and family caregivers.
  
2. Pilot Grant Program (Hodgson & Massimo, MPI) 4/1/19-6/31/20  
 Penn Institute on Aging/Alzheimer’s Disease Core  
*Evaluating Time Out: An Intergenerational Respite Program*  
 This pilot mixed method study will evaluate the impact of the Time Out Program on family and person with dementia outcomes .
  
- 3.Clinical Trials 2018 Pilot Program (Hodgson & McPhillips, MPI) 7/1/18-6/30/20  
 Institute for Translation Medicine and Therapeutics  
*“Enhancing Enrollment of Dyads in Dementia Research”*  
 The aims of the pilot study are to evaluate remuneration strategies to enhance recruitment of dyads of persons with dementia and family caregivers in the community.

NINR

*“Meaningful Activity and Quality of Life in older Latinos with Dementia”*

This minority supplement study uses a mixed-methods approach to culturally adapt the timed activity protocol in the parent study (“Healthy Patterns”) with input from Latino elders with dementia and their caregivers (Phase I); and to evaluate the feasibility and proof of concept of the tailored activities on outcomes related to quality of life, sleep disruption, and behavioral symptoms (Phase II).

5. R01 NR015226-01, N. Hodgson (PI)

6/16 – 2/21

NINR

*“The Role of Palliative Care Interventions to Reduce Circadian Rhythm Disorders in Persons with Dementia”*

This 5-year efficacy trial will test the “Healthy Patterns” intervention, a home-based activity intervention designed to improve symptoms of circadian rhythm disruption (CDR) and quality of life (QOL) in persons with dementia and their family caregivers. The success of the intervention will be determined by its impact on palliative outcomes including patient and caregiver measures of QOL as well as actigraphic, neuroendocrine, and proxy reported measures of CRD symptoms.

6. U54AG063546 (MPIs: Mor & Mitchell)

08/01/19 – 07/31/24

NIA

*NIA AD/ADRD Health Care Systems Research Collaboratory*

The NIA AD/ADRD Collaboratory will provide the national infrastructure necessary to catalyze and support embedded pragmatic clinical trials of non-pharmacological interventions for persons with dementia. By convening national experts to provide consultation and guidance to Collaboratory-funded pilot projects and NIA-funded trials, the Collaboratory has the potential to transform care delivery, quality, and outcomes for millions of Americans suffering with AD/ADRD.

Role: Co I

7. CDC (PI of Pilot: Demiris)

8/1/21-7/31/24

*Using innovative technology to facilitate fall prevention for older adults with mild cognitive impairment.*

The purpose of this study is to examine the use of a passive monitoring system in predicting fall risk for older adults with MCI living independently and compare this tool to currently accepted clinical assessment methods such as self-report measures of function and performance-based tests that typically take place in medical offices.

Role: Co I

8. P30AG06510 (PI:Halpern, Pilot PI Hodgson)

8/1/19-7/31/24

*Transforming residential palliative care for persons with dementia through behavioral economics and data science*

This Center will support the development of a research Center with one Core and two Pilot Projects focused on; 1) translating mechanistic insights from behavioral economics and data science into scalable interventions that change clinicians’ and family caregivers’ behaviors

related to persons with dementia long-term support services (LTSS) facilities; and 2) facilitating collaborations and mentoring relationships among investigators from across the U.S. with expertise in all NIH Stages of behavioral intervention research and in key methodologic areas  
Role: , PI of Pilot

9. Alzheimer's Association (PI Hodgson) 1/1/20-12/31/25

*Evaluation of Implementation of a Dementia Care Coordination Program*

The purpose of this study is to evaluate the barriers and facilitators to program implementation of a Dementia Care Coordination between health systems in Illinois and Missouri.

### **Past Grant Support**

Institute on Aging, University of Pennsylvania (Ersek PI) 7/17–6/18

*Palliative Care Consultation for Patients with Advanced Dementia in the Post-acute Skilled Nursing Units*

Role: Co-I

R01 AG041781-01, L. Gitlin (PI) 1/13 – 12/18

NIA

*“Reducing agitation in dementia patients at home: The Customized Activity Trial”*

This Phase III efficacy trial tested a novel 8-session, 3-month patient-centric intervention, the Customized Activity Program (CAP). CAP was tested in a randomized two-group parallel design in which 250 people with dementia and their caregivers (dyads) were randomly assigned to receive CAP or a control intervention of equivalent in-home attention and social contact.

Role: Co-Investigator – Developed and trained study staff in attention control condition, oversaw fidelity monitoring and quality control procedures, developed online training platform for interventionists.

1C1CMS331332-01-00, Q. Samus (PI) 9/1/14  
– 9/31/20

Center for Medicare and Medicaid Services

*“Comprehensive home-based dementia care coordination for Medicare-Medicaid Dual Eligibles in Maryland.”*

This 3-year Health Care Innovation Award (1) implemented MIND at Home care program in 2 community based service agencies to serve 600 Medicare-Medicaid dually eligible older adults with dementia; (2) developed a web-based MIND certification package; and (3) developed and tested a payment model.

Role: Co-Investigator – Leading developing of web-based training platform in the Mind-at-Home protocol.

P30 NR01413, N. Hodgson (Pilot PI) 8/1/13 –  
7/31/16

NINR

*“Disrupted sleep, neuroendocrine status and the behavioral symptoms of dementia.”*

This pilot proof-of-concept trial tested a novel 4-session Timed Activity intervention. The intervention is being tested in a randomized two-group parallel design in which 80 people with

dementia and their caregivers (dyads) will be randomly assigned to receive the timed activity or a control intervention of equivalent in-home attention and social contact.

K23NR012017, N. Hodgson (PI)

1/11 – 7/14

NINR

*“Adrenocortical response and neuro-psychiatric symptoms in Alzheimer’s disease”*

The aim of this career development award was to develop a program of research to design, implement, and evaluate sensory-based intervention directed at relieving physiologic stress and neuropsychiatric symptoms in older individuals with advanced stage Alzheimer’s Disease.

IG70654, L. Gitlin (PI)

7/12 –

6/14

Legg Mason Investor Services

*“Aging and Its Financial Implications”*

The major goal of this project was to develop and evaluate training materials for financial advisors working with older adult clients.

Role: Co-Investigator - Developed training content on financial trends among older Americans.

R21HD068857, L. Winter (PI)

12/11 –

11/14

NICHHD

*“Evaluation of the veterans’ in-home program for veterans with TBI and families”*

This study was a randomized controlled trial of the effectiveness of a home-based, non-pharmacological intervention for improving quality of life and functioning in returning veterans with TBI and their families.

Role: Co-Investigator - Refined intervention protocol, assisted with selection of measurement outcomes and the interpretation of study findings.

IRG11495, N. Hodgson (PI)

1/08 – 12/10

American Cancer Society

*“Palliative touch therapies and biosocial measures of stress in older adults with solid tumors”*

The goal of this project was to examine the feasibility and efficacy of a sensory-based palliative intervention in older nursing home residents with cancer.

R21MH069425, L. Gitlin (PI)

2/08 –

5/10

NIMH

*“Tailored activity to improve affect in dementia at home”*

This study was a randomized controlled trial to test the effectiveness of a home-based, non-pharmacological intervention for improving affect in home-dwelling persons with dementia.

Role: Co-Investigator - Developed and trained study staff in attention control condition, oversaw fidelity monitoring and quality control procedures, performed statistical analysis, interpretation and dissemination of study findings.

FG 1D31HP08834, C. Arenson (PI) 10/07 – 6/10,  
HRSA

*“Geriatric Education Center”*

This initiative aimed to disseminate and improve geriatric education through the training of medical students, residents, faculty, and interdisciplinary healthcare professionals.

Role: Co-Investigator - Developed training content for modules on interprofessional teams, communicating with older adults, end of life care/palliative care, and dementia care.

R01AG 22254, L.N. Gitlin (PI) 10/06 –  
9/09

NIA/NINR

*“Reducing family caregiver upset with disruptive behavior”*

This study was a randomized controlled trial to test the effectiveness of a home-based, non-pharmacological intervention for reducing upset and burden in caregivers of persons with dementia.

Role: Co-Investigator - Developed and trained study staff in attention control condition oversaw fidelity monitoring and quality control procedures, performed statistical analysis and interpretation of study findings.

PG, N. Hodgson (PI) 7/05 – 6/07

Farber Family Foundation

*“Palliative dementia care program evaluation”*

The goal of this project was to develop and evaluate a model of palliative care for persons with dementia residing in long-term care settings.

PG, N. Hodgson (PI) 4/04 – 3/05

North Penn Community Health Foundation

*“Palliative care outreach to regional nursing homes”*

The goal of this project was to export and evaluate an interprofessional training curriculum for nursing home providers in Pennsylvania.

PG, N. Hodgson (PI) 12/03 – 4/04

Rubenstein Charitable Foundation

*“Hearts and Hands: Palliative dementia care curriculum for nursing home teams”*

The goal of this project was develop and evaluate an interprofessional curriculum for nursing home providers in palliative care.

8/04

9/03 –

HRSA

*“Geriatric nursing knowledge & experience in long term care facilities”*

The goal of this project was to examine an immersive model of geriatric nursing education in dementia care.

Role: Co-Investigator – Supervised students during clinical rotation, conducted evaluation of immersive model.

HHS100-02-0017, V. Freedman (PI)

3/03 – 2/05

Assistant Secretary for Planning and Evaluation

*“Promoting disability decline: A framework for identifying high impact interventions”*

Goals were to develop and to demonstrate a new framework for comparing the population-level effects of different types of interventions designed to reduce disability.

Role: Co-Investigator – Led systematic review of literature, assisted with development of framework and interpretation of statistical projections.

PG, N. Hodgson (PI)

11/02 – 10/04

Sigma Theta Tau International Nursing Honor Society

*“The impact of passive nurse call technology on nursing home fall rates”*

The goal of this project was examine the effects of a passive monitoring system on incident fall rates in the nursing home setting.

ME -02-154, K. van Haitsma (PI)

9/02 – 1/04

Commonwealth of Pennsylvania Department of Health

*“The impact of passive monitoring technology on resident functioning in the nursing home”*

The goal of this mixed-method design study was to examine the barriers and facilitators related to adoption of a passive monitoring system in the nursing home setting.

Role: Co-Investigator – Conducted qualitative and quantitative data analysis, and assisted with dissemination of study findings

R03AG021590-01, N. Hodgson (PI)

5/02 – 4/06

NIA

*“Post-operative cancer mortality in U.S. elderly”*

The goal of this project was to examine mortality differentials in a representative sample of older adults with incident cancer diagnosis during the post-operative recover period.

PG, N. Hodgson (PI)

5/02 – 4/03

Oncology Nursing Society Foundation

*“Forecasting hospitalization needs in the Medicare cancer population.”*

The goal of this project was to examine time to hospitalization in a representative sample of older adults with incident solid tumor diagnosis.
