

My life at Penn & in China

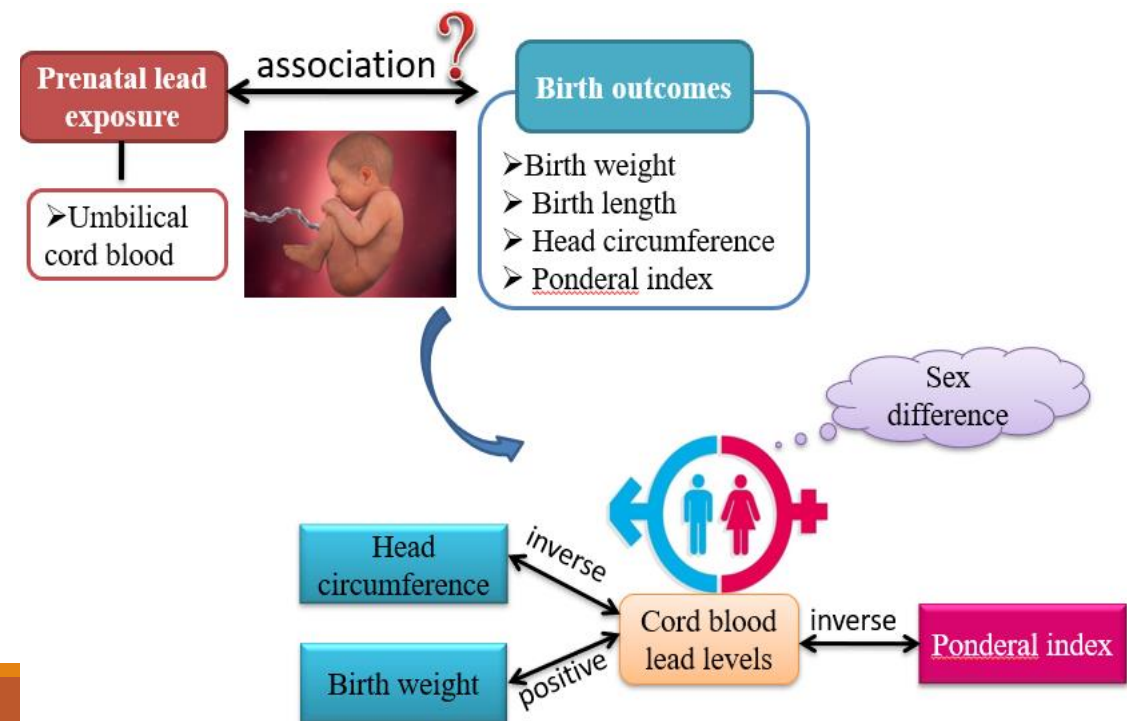

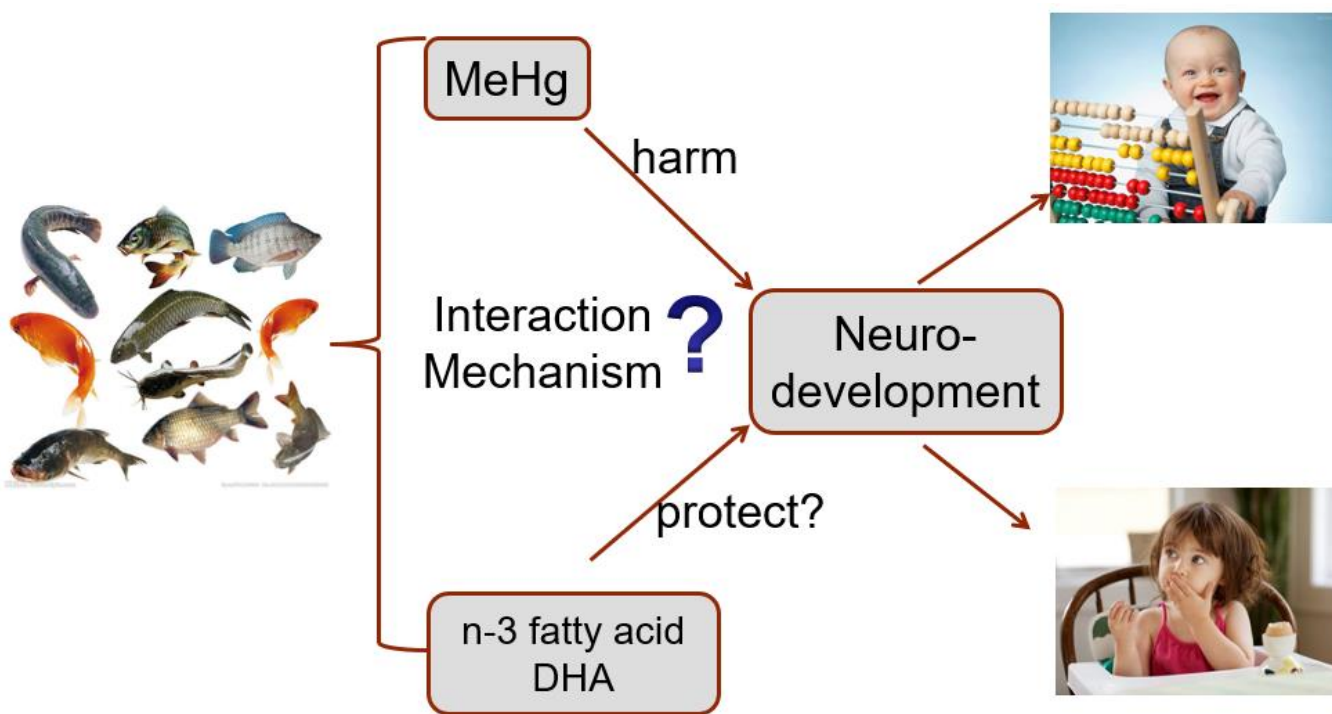

Ju Wang

Visiting scholar mentored by Dr. Jianghong Liu
Shanghai Jiao Tong University School of Medicine

PhD study

- ◆ Research Area: children's environmental health
- The effects of heavy metals (lead, mercury) on child growth and neurodevelopment
- Epidemiology study and animal experiment

Why and how I came to

- My career goal: to be a Nursing faculty in a research-oriented university in China and do interdisciplinary researches
- Long-term collaboration between my supervisor in China and Dr. Liu
- Penn nursing is ranked as the best nursing school in the world and advances the entire profession, from research & education to practice & policy
- My research interests match Dr. Liu's very well
- Awarded a scholarship under the State Scholarship Fund(China Scholarship Council)

My study and life at Penn

Participate and coordinate Penn global seminar: environmental health and global implication

2017 in Shanghai

2018 in Shanghai

My study and life at Penn

Involved in the entire process: syllabus, Shanghai Itinerary, budget, grading...

My study and life at Penn

Penn global seminar: Traditional Chinese Medicine-The power of taking action

My study and life at Penn

- Submitted a manuscript related to my doctoral dissertation under the guidance of Dr. Liu
 - Learned a lot about longitudinal methodology, academic writing, skills in responses to the reviewers
- Completed another manuscript and will submit it soon
- Participated in a RCT pilot study in the summer
 - Better understood “double blind”
 - Shared my knowledge about covariates and confounders with the undergraduates
- Involved in a grant application
 - Knew the importance of “re-consent”
 - Thought about the measures to reduce losses to follow-up in the longitudinal study

My study and life at Penn

Black
Friday in
US

over My Home Village.
--- Fu Du(famous poet)

My study and life in US

Trip to Washington DC

My study and life in US

Food at the
canteen in China

Food
cooked
by myself
in the US

What the US impresses me deeply

- Support for doing researches is professional and accessible
 - from team, company, university
 - to the researchers, students
- Information system is well established
 - thoughtful reminders
- The students have an excellent ability of collecting information generally
- The wide and frequent uses of letters

How will the visiting at Penn impact my career

- Help me do the interdisciplinary researches in the future
- Improve my ability of international communication and cooperation
- Conduct a longitudinal study if possible

Xiaolongbao

Stinky tofu

Shengjianbao

Hongshao rou (Red-braised pork)

Lion head meatballs

Shanghai steamed crab

Thank you for your listening and welcome to China !
