- 2004 **Recipient**, Wellstar Foundation Scholarship, Wellstar Health System, Marietta, GA

RESEARCH

Past/Present Funded Research Grants

- 2021 – present **Primary Investigator**. *SHIFTs (Sexual Health Inclusivity during Family Talks for Lesbian, Bisexual and Queer Girls)*. Penn Nursing Office of Nursing Research/Center for Global Women's Health Endowed Research Fund. This proposed study will collect qualitative data from parents and their cisgender lesbian, bisexual, or queer-identifying female adolescents (henceforth LBQ adolescents) to uncover how parent-child sex communication at home may be leveraged to minimize negative health outcomes. Through interviews, focus groups, and card-sorts, sexual health issues pertinent to LBQ adolescents' emerging attractions, behaviors, and identities will be identified to inform the development of an intervention targeting this youth population.
- 2020 – present **Primary Investigator**. *Defining Gender-Inclusive Sex Talks*, The Adolescent Medicine Trials Network for HIV/AIDS Interventions (ATN) Concept Capsule, NIH Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD). (U24HD089880). With transgender and gender nonbinary adolescents living at home, parents are optimal HIV/STI prevention educators because they are able to reach youth early to provide sequential and time-sensitive information that is responsive to the child's questions and anticipated needs. Because more children are disclosing to their parents of being transgender at younger ages and there is growing parental acceptance of transgender children, it is important to explore the potential of transgender-focused parent-child sex communication. The main study aims include describing the experiences of transgender adolescents and parents regarding parent-child sex communication, including identifying HIV and sex-related topics for which dyads feel they need to discuss and not discuss with one another and soliciting from parent-child dyads their ideas for an emergent, transgender-focused parent-child sex communication intervention.
- 2020 – present **Co-Investigator**. *Reducing HIV vulnerability through a multilevel life skills intervention for adolescent men* (U01MD011274-01 - PIs: Bauermeister, Sullivan & Stephenson). We propose to deliver and test a life skills intervention targeting the key domains that fuel HIV disparities among adolescent MSM in the United States. This RCT will yield important information regarding the delivery of a developmentally appropriate HIV prevention program that reaches racial/ethnic and socioeconomically diverse sample of AMSM across four regions in the United States.

- 2018, 2020, 2021 **Awardee**, NIH Loan Repayment Program. *The Role of Family Communication in the Sexual Socialization of Young Men Who have Sex with Men*, National Institute on Minority Health and Health Disparities (NIMHD).
- 2019 – 2021 **Primary Investigator**. *Intervention Adaptation for Cuidalos into Parents Advancing Supportive and Sexuality Inclusive Sex Talks*. University Research Foundation. University of Pennsylvania Office of the Vice Provost for Research. Using the ADAPT-ITT Model, this intervention adaptation study transformed *Cuidalos* into a video-based sex communication intervention for parents of GBQ youth, tentatively named Parents ASSIST (Parents Advancing Supportive and Sexuality-Inclusive Sex Talks). The specific aims (SA) of the study were to conduct a systematic intervention adaptation to transform *Cuidalos* into Parents ASSIST using the ADAPT-ITT Framework and to determine the feasibility and acceptability of Parents ASSIST as a parent-centered GBQ-focused sex communication intervention.
- 2018, 2021, 2022 **Primary Investigator**. *Family-Based Sexual Health Programming for Sexual and Gender Diverse Youth*. Penn Undergraduate Research Mentorship (PURM) Summer Awards. Center for Undergraduate Research and Fellowships and University of Pennsylvania Office of the Vice Provost for Research. These 10-week summer research awards are for one-on-one mentorship of underrepresented undergraduate students to conduct engaged work on the health of LGBTQ individuals. Research opportunities for successful applicants include data collection and clean-up, analyses, literature reviews and manuscript preparation.
- 2017 – 2020 **Pilot Investigator**. *Parents as HIV/STI Prevention Agents for Gay, Bisexual, and Queer Adolescents through Comprehensive Parent-Child Sex Communication*. (R25MH087217, PI: Kershaw, National Institute of Mental Health [NIMH]). From a national sample of parents whose male adolescent sons self-identify as GBQ, participants who either have or have not had any conversations about sex with their sons were recruited for focus groups, in-depth interviews, card sorts, and theater testing. This strategy that focuses on parents' perceptions about sex communication informed the refinement of a GBQ-specific conceptual model about parent-child sex communication and the ecological systems that they and GBQ males navigate.
- 2017 – 2019 **Primary Investigator**. *Parents ASSIST (Parents Advancing Sexuality-Sensitive and Inclusive Sex Talks)*. Alex and Rita Hillman Family Foundation Emergent Innovation Grant. This pilot intervention sought to disrupt gay, bisexual, and queer (GBQ) adolescents' vulnerability to HIV/STI infection by equipping the parents of GBQ teenagers with skills needed to engage their children in affirming and supportive sexuality-inclusive talks. We built on evidence-based strategies and other sources to create an online program featuring a series of 16 theoretically informed videos that taught and modelled for 30 parents from diverse backgrounds how they can communicate about sex with their GBQ teens through supportive and inclusive discussions.
- 2016 – 2018 **Postdoctoral Research Fellow**. Research on Vulnerable Women, Children, and Families (*T32NR007100*, PI: *Medoff-Cooper*; National Institute of Nursing Research [NINR]). University of Pennsylvania, School of Nursing. Philadelphia, PA.

- 2014 – 2016 **Primary Investigator.** *Parents as Sexuality Educators: Implications for HIV Prevention.* Ruth L. Kirschstein National Research Service Award (**F31NR015013**; National Institute of Nursing Research [NINR]).
- 2015 – 2016 **Primary Investigator.** Surgeon General C. Everett Koop Dissertation Research Grant. “*Parents and HIV Prevention in the Home for Gay, Bisexual and Queer Sons.*” Indiana University School of Public Health.
- 2014 – 2014 **Summer Research Fellowship.** Duke University Graduate School.

Past/Present Funded Program Grants (Educational or Practice)

- 2012 – 2014 Jonas Center Nurse Leader Scholar, Cohort II. Duke University School of Nursing.
- 2010 – 2012 Robert W. Woodruff Fellow for Master of Science in Nursing, Nell Hodgson Woodruff School of Nursing, Emory University.
- 2009 Professional Development Fund, Emory President’s Commission on Sexuality, Gender Diversity, and Queer Equality, Emory University.

Doctoral Dissertation

“*The Perspectives of Gay, Bisexual, and Queer Adolescent Males with Parent-Child Sex Communication.*” (July 21, 2016) Supervisor: Dr. Julie Barroso. This study explored gay, bisexual, and queer (GBQ) adolescent males' perceptions of sex communication in the home. The specific aims of this study were to describe the perceptions of GBQ adolescent males regarding parent-child sex communication; to identify the sex-related topics for which GBQ adolescent males feel they need parental guidance; and to elicit suggestions from gay adolescent males on how parents might initiate and sustain parent-child sex communication. The study provides the foundation for interventions to help parents effectively inform their GBQ sons about how to reduce their chances of becoming infected with HIV and STIs. ProQuest ID: 13634.
