Impact of a multi-modal allergen immunotherapy (SCIT) education and training program for primary care nurses at VA Connecticut (VACT)

**Problem**
- Limited availability for SCIT patient services at VACT
- SCIT poses risk of anaphylaxis
- Major gaps in anaphylaxis knowledge among nurses and physicians

**Population**
- 23 VACT RNs
- 1 specialty clinic
- 9 PC clinics
- 12 RNs trained virtually
- 11 RNs trained in-person

**Objective**
- Primary care (PC) nurse competencies & SCIT availability in VACT PC clinics statewide

**Intervention**
- Didactic webinar
- Virtual or In-person clinical training
- Site visits

**Results**
- 4-month cycle
- SCIT-READY PC CLINICS: 22% → 78%
- KNOWLEDGE LEVEL: ↑ 11%
- COMPETENCY LEVEL BY TRAINING MODE: VIRTUAL = IN-PERSON
