This index was originally intended for my own use in my work as librarian of the Nurses' Reference Library at the Massachusetts General Hospital, Boston, Massachusetts. At the insistence of Miss Helen Wood, Director of the Simmons College School of Nursing, I informed Miss Claribel Wheeler, Executive Secretary of the National League of Nursing Education, of the work I was doing. Since there are so few indices to literature of the nursing profession, it was felt that this would be beneficial to the entire profession and I was urged to submit it for publication. I ask your indulgence for whatever discrepancies may be found in the index on the basis of the fact that it was compiled, for the most part, during my spare moments and over a period of a year and a half. It is difficult to do exacting work of this nature at such an irregular pace and for that reason I fear there may be some errors or omissions.

All Annual Reports of this organization are here indexed from the first meeting in 1894 through the convention of 1939. The index is arranged alphabetically by author, subject, and title. Committee and round table reports are included as well as original papers. I was particularly fortunate in that the Massachusetts General Hospital has a complete set of the Annual Reports and each one has been personally examined.

I wish to acknowledge my thanks to Miss Sally Johnson, Principal of the Massachusetts General Hospital Training School for Nurses, to Miss Blanche E. Edwards, Principal of the Bellevue and Mills Training Schools for Nursing, New York, and also to Miss Emma L. Chaffin, Librarian of the Carrie J. Brink Memorial Library, for permission to work on this during library hours. I wish to express my appreciation to Miss Caroline L. Williams, Librarian of the Treadwell (Medical) Library of the Massachusetts General Hospital, for her encouragement and cooperation when the task seemed overwhelming, and also to my various friends who came to my rescue and helped in the typing.

I give this work to the National League of Nursing Education in the hope that it may add another step to the progress of nursing education and prove to be a useful aid to the nursing school librarian in her search for elusive material.

D. Maxine Bailey, Compiler

New York, New York, April 2, 1940.
