PREFACE

Current trends in nursing education have made a knowledge of the activities and proceedings of the National League of Nursing Education imperative. In order to facilitate research in this direction, a continuation of the Cumulative Index to the Annual Reports of the National League of Nursing Education, 1894-1939, was undertaken. Having been modeled after the fine work of D. Maxine Bailey, this project is concerned with the period 1940-1950 inclusive.

It is hoped that the results of this activity will prove as useful to others as it has to the faculty and students of St. Vincent's College of Nursing, Los Angeles, California.
