Inmates during and post-incarceration are 3 to 4 times more than the general population to use tobacco (Garver-Apgar et al., 2023).

Lack of resources, relapse prevention programs and interventions provided to inmates (Garver-Apgar et al., 2023).

**Conclusion**

Project evaluation showed the value of 5As to identify inmates who smoke and provide resources and support to smoking cessation.

**Pre/Post Chart Review of Utilization of 5As**

**Willing to Quit Identified**

<table>

**Figure:**

- **ASK**
  - Do you use tobacco?
  - * Every inmate
  - * Every non-emergent encounter

- **ADVISE**
  - To quit
  - Offer Educational Handout

- **ASSESS**
  - * Are you willing to quit

- **ASSIST**
  - * If No: Encourage Cessation
  - Or
  - If Yes: Offer handout on Nicotine Patch

- **ARRANGE**
  - * Follow up encounter
  - * Perform 5As at every non-emergent encounter
